

AL RUWAIS PORT

Al-Ruwais Port, the second commercial port, is located at the northern tip of Qatar. The port plays the role of an additional access facility to promote the regional commercial shipments and to revive and invigorate the economy of the northern part of Qatar.

Al Ruwais port is located on the North coast almost 100km from Doha. Besides the usual handling of general cargoes, the port is now handling the increased demand of foodstuff and other commodities. Al Ruwais port provides a ready solution by acting as gateway for fresh commodities from neighbouring countries. These also included frozen and chilled commodities arriving in reefer containers. Al Ruwais port also handles livestock along with perishable goods

Ruwais Port has witnessed recently substantial improvements by Mwani Qatar in an effort to rehabilitate and align it with international ports standards. The navigation channel at Ruwais Port is dredged to 5 meters, new docks are built at 7 meters depth and six marine berths constructed at a combined total length of 1414 meters, to be able to accommodate commercial vessels.
